

SUMMARY

Computer Science student specializing in AI/ML and Full-Stack development. Experienced in building physics-aware deep learning models (TensorFlow) and multi-agent AI orchestration pipelines. Proven track record in research and UI/UX design with a focus on scalable, data-driven solutions.

EDUCATION

Year	Degree/Certificate	Institute	CGPA
Present	B.Tech Computer Science	Vishwakarma Institute of Technology	8.9

PUBLICATIONS & ACHIEVEMENTS

- **IEEE 13CTCON 2026**

Mar 2026

Certificate, Co-Author

– Presented and co-authored "Physics-Aware Spatiotemporal Forecasting of Methane Emissions Using Multi-Source Satellite Data and Deep Learning" detailing the SAT-MethaneNet framework.
- **UI/UX Designathon Runner-up**

Freshman Year

Figma Hackathon

– Secured 2nd Place by creating high-fidelity prototypes under strict time constraints.

EXPERIENCE

- **Elevate Labs**

May 2026 - July 2026

AI & ML Intern (Awarded Best Performer)

Remote

– Actively contributed to comprehensive data analysis, end-to-end model development, and implementation of machine learning solutions to meet core project specifications.

– Optimized machine learning model performance and formulated well-structured technical solutions across complex datasets.

– Recognized as a Best Performer for demonstrating excellence, professional accountability, and impactful collaboration within the team.

PROJECTS

- **Agent Maria: Multi-Agent System**

GenAI

Python, LLMs, AI Orchestration

GitHub

– Engineered a multi-agent orchestration framework to automate complex workflows and enable independent AI personas to collaborate on task execution.

– Integrated large language models for autonomous decision-making, utilizing structured output aggregation for streamlined problem solving.
- **SAT-MethaneNet: Emission Forecasting**

Deep Learning

Python, TensorFlow, Earth Engine

GitHub

– Engineered a physics-aware Residual U-Net model using skip connections and Weighted MSE loss to predict methane dispersion.

– Developed a data fusion pipeline for Sentinel-5P and EMIT data using spatial rasterization and temporal interpolation.
- **"The AI Council" Startup Validator**

Full-Stack & AI

Next.js, n8n, Gemini 1.5 Flash

GitHub

– Engineered a multi-agent orchestration pipeline using n8n to evaluate startup concepts through specialized AI personas.

– Architected a Next.js frontend with secure API routes and LLM chaining for structured JSON data aggregation.
- **Oxlo AI Tutor**

GenAI

Python, Flask, Google Gemini Pro, HTML/CSS

GitHub

– Developed a responsive AI-driven tutoring platform using Flask and Google Gemini Pro for real-time educational assistance.

– Integrated a dynamic Markdown-based chat interface with specialized modules for setup, lab environments, and interactive learning.

TECHNICAL SKILLS

- **Languages:** Python, C++, JavaScript, SQL, HTML/CSS, Java
- **AI/ML:** PyTorch, TensorFlow/Keras, scikit-learn, pandas, NumPy, Hugging Face
- **Frameworks:** Next.js, React, Vite, Flask, WebAssembly (WASM)
- **Tools:** Git/GitHub, n8n, Figma, Google Earth Engine, Docker/MLflow (Familiar)

CERTIFICATIONS

- **Supervised Machine Learning: Regression and Classification**, DeepLearning.AI & Stanford
